

TEST REPORT

Report No.: STS220826001001E

Product: Smart Phone

Model No.: A52

Applicant: DOKE COMMUNICATION (HK) LIMITED

RM 1902 EASEY COMM BLDG 253-261 HENNESSY ROAD

Address: WANCHAI HK CHINA

Issued by: Shenzhen NTEK Testing Technology Co., Ltd.

Lab 1/F, Building E, Fenda Science Park, Sanwei Community,

Location: Xixiang Street, Bao'an District, Shenzhen 518126 P.R. China

Tel: 400-800-6106, 0755-2320 0050 / 2320-0090

This test report consists of **67** pages in total. It may be duplicated completely for legal use with the approval of the applicant. It should not be reproduced except in full, without the written approval of our laboratory. The client should not use it to claim product endorsement by NTEK. The test results in the report only apply to the tested sample. The test report shall be invalid without all the signatures of testing engineers, reviewer and approver. Any objections must be raised to NTEK within 15 days since the date when the report is received. It will not be taken into consideration beyond this limit.

TEST REPORT IEC/EN 62368-1

Audio/video, information and communication technology equipment Part 1: Safety requirements

Report Number:	STS220826001001E
Tested by (name + signature):	Helen Lin Henson Dong Henson Trend
Approved by (name + signature):	Henson Dong Henson Dung
Date of issue	2022-09-21
Testing Laboratory	Shenzhen NTEK Testing Technology Co., Ltd.
Address	1/F, Building E, Fenda Science Park, Sanwei Community, Xixiang Street, Bao'an District, Shenzhen 518126 P.R. China
Applicant's name:	DOKE COMMUNICATION (HK) LIMITED
Address:	RM 1902 EASEY COMM BLDG 253-261 HENNESSY ROAD WANCHAI HK CHINA
Test specification:	7 4 1 10
Standard:	☐IEC 62368-1:2014 (Second Edition)
	☑ EN 62368-1:2014+A11:2017
Test procedure:	CE Scheme
Non-standard test method:	N/A
Test Report Form No:	IEC62368_1B
Test Report Form(s) Originator :	UL(US)

Test Item description	Smart Phone
Trade Mark	Blackview
Manufacturer	Shenzhen DOKE Electronic Co., Ltd
Manufacturer address	801, Building3, 7th Industrial Zone, Yulv Community, Yutang Road, Guangming District, Shenzhen, China.
Model/Type reference	A52
Ratings	DC5V/2A or by rechargeable lithium battery: 3.85V, 5180mAh

TEST ITEM PARTICULARS:	
Classification of use by:	☑ Ordinary person
	☐ Instructed person
	☐ Skilled person
	☐ Children likely to be present
Supply Connection	☐ AC Mains ☐ DC Mains
AL 1996 AN	☑ External Circuit - not Mains connected
	- ⊠ ES1 □ ES2 □ ES3
Supply % Tolerance	☐ +10%/-10%
X	+20%/-15%
	+ <u>25</u> %/- <u>15</u> %
	⊠ None
Supply Connection – Type:	☐ pluggable equipment type A -
Z	non-detachable supply cord
	appliance coupler
	direct plug-in
\$ \frac{1}{2}	mating connector
	pluggable equipment type B -
	☐ non-detachable supply cord ☐ appliance coupler
	permanent connection
	☐ mating connector ☑ other: <u>DC connector</u>
Considered current rating of protective device as part	N/A (Not directly connected to mains)
of building or equipment installation:	Installation location: building; equipment
Equipment mobility	⊠ movable ⊠ hand-held ⊠ transportable
	stationary for building-in direct plug-in
	☐ rack-mounting ☐ wall-mounted
Over voltage category (OVC)	
	OVC IV Souther: (Not directly connected to mains)
Class of equipment	☐ Class I ☐ Class II ☐ Class III
Access location	restricted access location N/A
Pollution degree (PD):	□ PD 1 □ PD 2 □ PD 3
Manufacturer's specified maxium operating ambient:	40 °C
IP protection class:	☐ IP
Power Systems:	☐ TN ☐ TT ☐ IT - <u>230</u> V
Altitude during operation (m):	☑ 2000 m or less ☐ <u>5000</u> m
Altitude of test laboratory (m):	☐ 2000 m or less
Mass of equipment (kg):	⊠ approx. 0.186kg
at at suit	at Are 7

	· · · · · · · · · · · · · · · · · · ·
POSSIBLE TEST CASE VERDICTS:	
- test case does not apply to the test object	N/A
- test object does meet the requirement:	P (Pass)
- test object does not meet the requirement:	F (Fail)
TESTING:	
Date of receipt of test item:	2022-09-01
Date (s) of performance of tests:	2022-09-05 to 2022-09-13

GENERAL PRODUCT INFORMATION:

Product Description -

- -The maximum operating temperature is 40°C.
- -The unit shall be charged by approved external approved adapter and meet the IEC/EN 62368-1 standard requirements.

Model Differences – Designation model is different only.

- N/A

Additional application considerations - (Considerations used to test a component or sub-assembly) -

N/A

Copy of marking plate:

ENERGY SOURCE IDENTIFICATION AND CLASSIFICATION TABLE:

(Note 1: Identify the following six (6) energy source forms based on the origin of the energy.)

(Note 2: The identified classification e.g., ES2, TS1, should be with respect to its ability to cause pain or injury on the body or its ability to ignite a combustible material. Any energy source can be declared Class 3 as a worse case classification e.g. PS3, ES3.

Electrically-caused injury (Clause 5):

(Note: Identify type of source, list sub-assembly or circuit designation and corresponding energy source

classification)

Example: +5 V dc input ES1

Source of electrical energy	Corresponding classification (ES)		
Internal circuits	ES1		
Micro USB	ES1		
Charger output	ES1		

Electrically-caused fire (Clause 6):

(Note: List sub-assembly or circuit designation and corresponding energy source classification)

Example: Battery pack (maximum 85 watts): PS2

Source of power or PIS	Corresponding classification (PS)		
Internal circuits	PS1(Resistive PIS)		
Battery pack/cell output	PS2(Resistive PIS)		

Injury caused by hazardous substances (Clause 7)

(Note: Specify hazardous chemicals, whether produces ozone or other chemical construction not addressed as part of the component evaluation.)

Example: Liquid in filled component Glycol

Source of hazardous substances	Corresponding chemical		
Battery	Complied with annex M		

Mechanically-caused injury (Clause 8)

(Note: List moving part(s), fan, special installations, etc. & corresponding MS classification based on Table 35.) Example: Wall mount unit MS2

Source of kinetic/mechanical energy	Corresponding classification (MS)
Sharp edges and corners of accessible parts	MS1
Product mass	MS1

Thermal burn injury (Clause 9)

(Note: Identify the surface or support, and corresponding energy source classification based on type of part, location, operating temperature and contact time in Table 38.)

Example: Hand-held scanner – thermoplastic enclosure TS1

Source of thermal energy	Corresponding classification (TS)		
Accessible parts	TS1		

Radiation (Clause 10)

(Note: List the types of radiation present in the product and the corresponding energy source classification.) Example: DVD – Class 1 Laser Product RS1

Type of radiation	, Q	Corresponding classification (RS)	
LED S		RS1	

ENERGY SOURCE	IDENTIFICATION AND CLASSIFICATION TABLE:	
Acoustic	RS2

Clause	Requirement + Test	Result - Remark	Verdict
	T 7 5		1
	Add the following note: NOTE Z1 The use of certain substances in electrical and electronic equipment is restricted within the EU: see Directive 2011/65/EU.	at state	PL
.Z1	Add the following new subclause after 4.9:		Ņ/A
A STATE	To protect against excessive current, short-circuits and earth faults in circuits connected to an a.c. mains, protective devices shall be included either as integral parts of the equipment or as parts of the building installation, subject to the following, a), b) and c):	t with with	
4.	a) except as detailed in b) and c), protective devices necessary to comply with the requirements of B.3.1 and B.4 shall be included as parts of the equipment;	with with will	- 4
A COL	b) for components in series with the mains input to the equipment such as the supply cord, appliance coupler, r.f.i. filter and switch, short-circuit and earth fault protection may be provided by protective devices in the building installation;	west with	
	c) it is permitted for pluggable equipment type B or permanently connected equipment, to rely on dedicated overcurrent and short-circuit protection in the building installation, provided that the means of protection, e.g. fuses or circuit breakers, is fully specified in the installation instructions.		, L
	If reliance is placed on protection in the building installation, the installation instructions shall so state, except that for pluggable equipment type A the building installation shall be regarded as providing protection in accordance with the rating of the wall socket outlet.		Zi-lit
.4.2.3.2.4	Add the following to the end of this subclause:	4 3	N/A
~	The requirement for interconnection with external circuit is in addition given in EN 50491-3:2009.	+ 4100	*
0.2.1	Add the following to ^{c)} and ^{d)} in table 39: For additional requirements, see 10.5.1.		N/A

. L	EN 62368-1	Report No. 515220826001001E	-
Clause	Requirement + Test	Result - Remark	Verdict
Olause	Trequirement, Test	result Fernance	Voluiot
10.5.1	Add the following after the first paragraph:		N/A
4	For RS 1 compliance is checked by measurement under the following conditions:		4
- F.	In addition to the normal operating conditions, all controls adjustable from the outside by hand, by any object such as a tool or a coin, and those internal adjustments or presets which are not locked in a reliable manner, are adjusted so as to give maximum radiation whilst maintaining an intelligible picture for 1 h, at the end of which the measurement is made.	et gret gret .	STEP .
A.	NOTE Z1 Soldered joints and paint lockings are examples of adequate locking.	At a	- 4
	The dose-rate is determined by means of a radiation monitor with an effective area of 10 cm ² , at any point 10 cm from the outer surface of the apparatus.	Filt A, Air	
A. A.	Moreover, the measurement shall be made under fault conditions causing an increase of the high-voltage, provided an intelligible picture is maintained for 1 h, at the end of which the measurement is made.	Ariet Ariet Ariet	
	For RS1, the dose-rate shall not exceed 1 μSv/h taking account of the background level.	*	
<u></u>	NOTE Z2 These values appear in Directive 96/29/Euratom of 13 May 1996.	A THE PARTY AND ADDRESS OF THE PARTY AND ADDRE	
10.6.1	Add the following paragraph to the end of the subclause:		N/A
G	EN 71-1:2011, 4.20 and the related tests methods and measurement distances apply.		et
10.Z1	Add the following new subclause after 10.6.5.		N/A
	10.Z1 Non-ionizing radiation from radio frequencies in the range 0 to 300 GHz	C SEEL ASSESSMENT	Ť
A. E.	The amount of non-ionizing radiation is regulated by European Council Recommendation 1999/519/EC of 12 July 1999 on the limitation of exposure of the general public to electromagnetic fields (0 Hz to 300 GHz).		
A COL	For intentional radiators, ICNIRP guidelines should be taken into account for Limiting Exposure to Time-Varying Electric, Magnetic, and Electromagnetic Fields (up to 300 GHz). For hand- held and body-mounted devices, attention is drawn to EN 50360 and EN 50566		et ti

	EN 62368-1		4
Clause	Requirement + Test	Result - Remark	Verdict

6.2.2	Table: Electrical	Р			
Source	Description	Measurement Max Power after 3 s		Max Power after 5 s*)	PS Classification
Battery		Power (W) :		16.9	10 3
pack	Normal	V _A (V) :	(2.84	PS2
output		I _A (A) :		5.95	

Supplementary Information: SC: short circuit

- (*) Measurement taken only when limits at 3 seconds exceed PS1 limits.
- (&) Power measurement for worst-case fault.
- (#) Power measurement for worst-case power source fault.

6.2.3.1	Table: Determination of Potential Ignition Sources (Arcing PIS)							
		Open circuit voltage After 3 s	Measured r.m.s current	Calculated value	Arcing PIS?			
	Location	(Vp)	(Irms)	(V _p x I _{rms})	Yes / No			
	4- Z		- *		X			

Supplementary information:

An Arcing PIS requires a minimum of 50 V (peak) a.c. or d.c. An Arcing PIS is established when the product of the open circuit voltage (V_p) and normal operating condition rms current (I_{rms}) is greater than 15.

6.2.3.2 Table: Determination of Potential Ignition Sources (Resistive PIS)								
Circuit Location (x-y)	Operating Condition (Normal / Describe Single Fault)	Measured wattage or VA During first 30 s (W / VA)	Measured wattage or VA After 30 s (W / VA)	Protective Circuit, Regulator, or PTC Operated? Yes / No (Comment)	Resistive PIS? Yes/No			
Battery output		🔽			Yes			

Supplementary Information:

All internal circuits were considered as resistive PIS.

A combination of voltmeter, VA and ammeter IA may be used instead of a wattmeter.

If a separate voltmeter and ammeter are used, the product of (VA x IA) is used to determine Resistive PIS classification.

A Resistive PIS: (a) dissipates more than 15 W, measured after 30 s of normal operation, <u>or</u> (b) under single fault conditions has either a power exceeding 100 W measured immediately after the introduction of the fault if electronic circuits, regulators or PTC devices are used, or has an available power exceeding 15 W measured 30 s after introduction of the fault.
